

America is in deep trouble today as we are deep in debt, low on money, and are in need to find a cure to financial woes. Our nation is in need of something to boost our economy and save us money. So too you America, I say I have a plan.

Today, we have devices such as computers, cell phones, or other electronic devices. With the modern technology we have, we are able to surf the internet, read, & so much more. So here is my plan.

Firstly, We are able to learn, all by ourselves, on our electrical devices. So what do we need schooling for if we can learn from the comforts of a computer screen. It is my proclamation to you America, what if we cut classes such as school completely. There is no need for schooling because we can learn everything from our computer. I don't know about you, but I'd much rather look @ a computer screen all day, than go to school.

Secondly, it would save the govt a lot of cash. Because the govt spends over 2 Billion \$ a year on education. So if we cut school we could save a whole lot of money. We could use this money on more video games.

Thirdly, it'll give children the time to learn with their computer, cause when they grown up they will most likely have to use one in their job. So by cutting school the childrens could be learning to use computers a head of time. A lot of my friends, who are high school drop-outs, tell me that nothing else really matters except computers.

Fourthly, Most cellphones have the capability of calculating. So why would we need Math Class if we could just use our phones, calculators, or computers to do the Math for us. Besides, we were given ten fingers and ten toes, and I believe we were not meant to go past the number 19.

Sixthly, I believe that there is no success that ever comes from a schooling, for example, like Lindsay Lohan dropped out of high school and look how far she got! Like OMG she's like super famous. So again America, I state that school doesn't really matter, because where will it get you in life???

7ly, I also believe that it would releave a lot of stress off of peoples, four example students get lots of stress in skool, it can cause early depression as well. But students r not the only 1s who become stressed from skooling. Teachers can become stressed too. MAny teachers become sooo stressed from school dat they have they go home and scream themselves to sleep and watch many reruns of sienfield. This is not an LOL, dis is a serious promblem Americas & we the next generation needz 2 step up & take charge.

So America wats your decision? Should we cut skool completly? I thinks so! Bside we learn bye ourselves, it would save alot of cash, it would give childrens time to lean with there computer, we can use caculators instead off our headz. Skool does not grant suces, and it would relieve lots and lots of stress. :) So wat r u waiting 4 America? We r deep in debt, and this is my sulotion!
